

# Crafting Success Together

Kraftman Tooling, a Switzerland-based plastic injection company, delivers Integrated Manufacturing Solutions to global OEMs, product companies, and leading brands with advanced technical capabilities and industry expertise.

---

# About Us

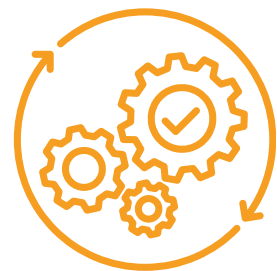

Kraftman Tooling , was established in 2020 with a vision to be an envoy in Watch-making Precision Injection Mold and Plastic Parts through leading edge technologies in compliance with Global Standards.

Kraftman Tooling is an ISO 9001:2015 certified manufacturer for “Design and Manufacturing of Injection Molds and Plastic products”,

# Why Us?

At Kraftman Tooling, we take pride in being at the forefront of mold manufacturing. Our expertise spans across both plastic injection molds and die-casting components, ensuring high-quality production tailored to meet the diverse needs of our clients.

## **Cutting-Edge Technology:**

Our advanced machinery ensures precision molds for superior performance.

## **Skilled Experts:**

A team of experienced professionals committed to delivering excellence.

## **Tailored Solutions:**

Custom-designed molds to meet your unique project requirements.

## **Uncompromising Quality:**

Every mold undergoes rigorous testing to maintain the highest standards before delivery.

# Our Services

## Program Management

Our capacities include reverse engineering, product, raw materials and manufacturing processes R&D and Advanced Product Quality Planning (APQP).

## Mold Design & Manufacturing

Our seasoned team combines expertise and cutting-edge technologies to craft moulds that not only meet but exceed your expectations. With a keen focus on precision and innovation,

## Plastic Injection Molding

we bring efficiency and precision to the process. Our expert team ensures seamless production of high-quality plastic components tailored to diverse industry needs.

## Decoration

As experts in plastic injection molding, we enhance parts with decorative finishes and customization. Utilizing processes like Pad Print, Hot Stamping, Silk Screen, Metallizing, Paint Process, and more, we seamlessly blend style and functionality for diverse industry applications.

## Integrated Assembly

In addition to plastic injection molding, we offer integrated product assembly and sourcing of components tailored to our customers' quality specifications

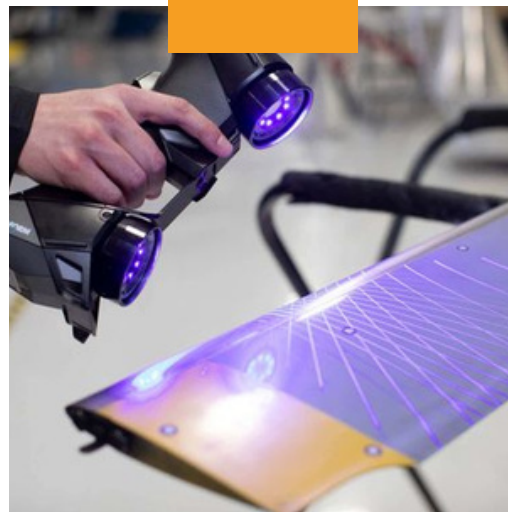

## Custom CNC Machining & Production

we specialize in precision components, offering turning and milling services on 5 and 6 axes, along with turnmill capabilities. Our advanced machining techniques ensure efficient and customized solutions for diverse industry needs.

# ENGINEERING - GIVE YOUR DREAM SHAPES

01

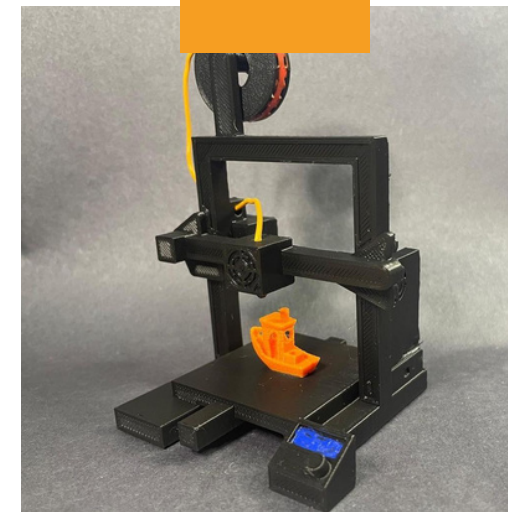

**Concept Designing**

02

**Rapid Prototyping**

03

**Reverse Engineering**

04

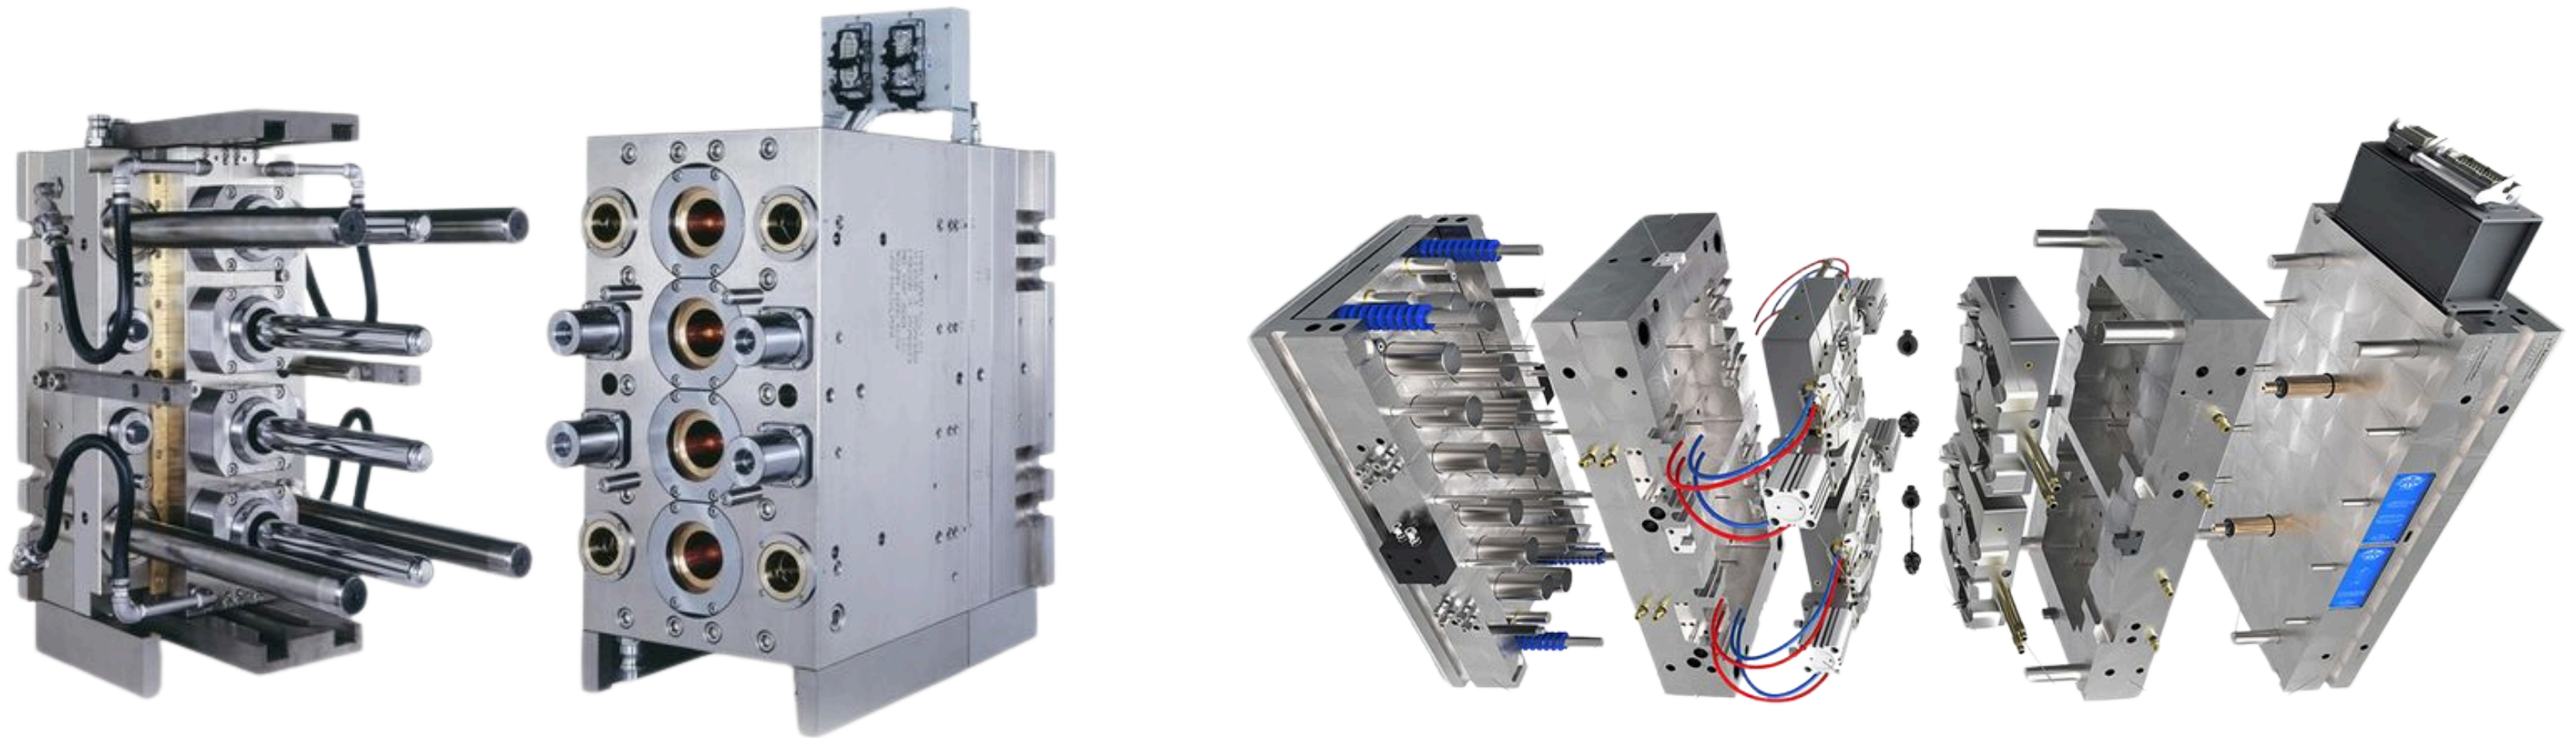

**R&D with Manufacturing Process**

# MOLD DESIGN & MANUFACTURING

Our skilled team, equipped with cutting-edge technologies including VMC, EDM, and conventional machines, crafts moulds that surpass expectations. With precision and innovation at the forefront, we ensure excellence in design and manufacturing.

# PLASTIC INJECTION MOLDING

Get affordable, high-quality molded parts and bridge tooling within days. With our free moldability consultation, the design and molding process is rapidly accelerated to save you time and money.

## DECORATION

Post-Processing for Molded Parts

Depending on your application's requirements, you can choose from the following when requesting an injection molding quote:

- Mold texturing
- Threaded inserts
- Pad printing
- Laser engraving
- Basic assembly

# INTEGRATED ASSEMBLY

In addition to plastic injection molding, we offer integrated product assembly and sourcing of components tailored to our customers' quality specifications

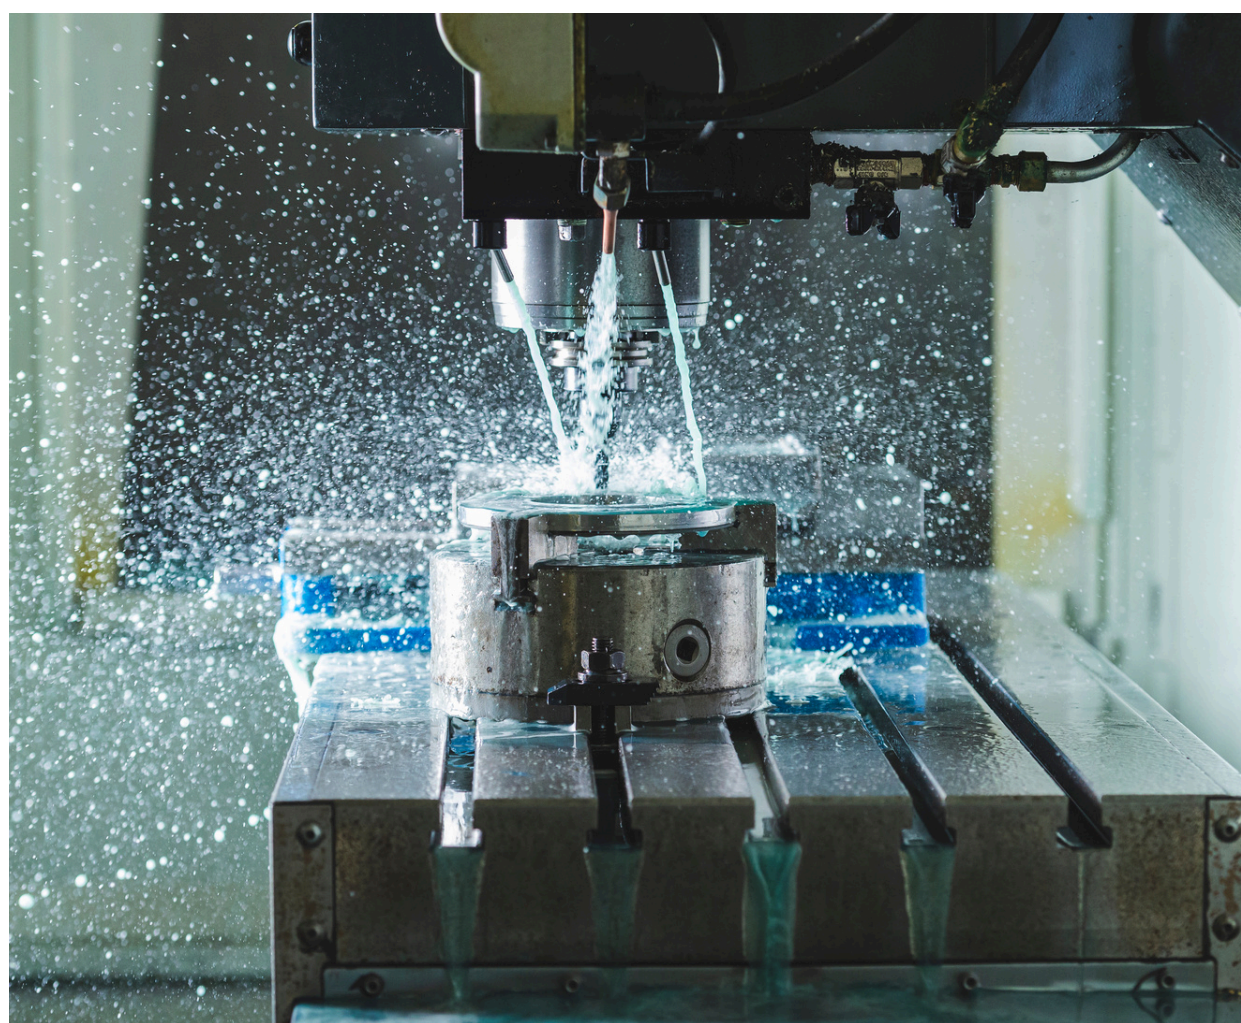

# CUSTOM CNC MACHINING & PRODUCTION

Leverage the same speed, precision, and reliability in machining that you're accustomed to but unlock advanced machining capabilities like tighter tolerances and volume pricing through our manufacturing network.

# They Marked Us

## Company Certifications

As an ISO 9001-2015 certified company, we prioritize quality at every step. From materials to final assembly, each process undergoes strict QC inspections, ensuring every component meets our standards before moving forward.

**ISO 9001:2015 QMS**

**ISO/IEC 17025:2017**
